FormWeigh

FORMULATION SOFTWARE®

The Formulation/Batching Solution for Flexibility and Reliability

**Formula weighing by Recipe or Order selection
on the Windows based ID20 terminal**

Standard version

- Stand-alone system with independent master data management
- Various weighing procedures (horizontal, vertical, etc.)
- Interactive operation and DeltaTrac filling guide
- Centralized processing of master and consumption data on separate master machine with linking of the weighing stations (master-slave configuration)
- Security concept featuring authorization levels and password protection
- Comprehensive documentation of the weighing process
- Connectivity enabled for several scales/balances, printers and barcode readers

Extendable to a multi-user system

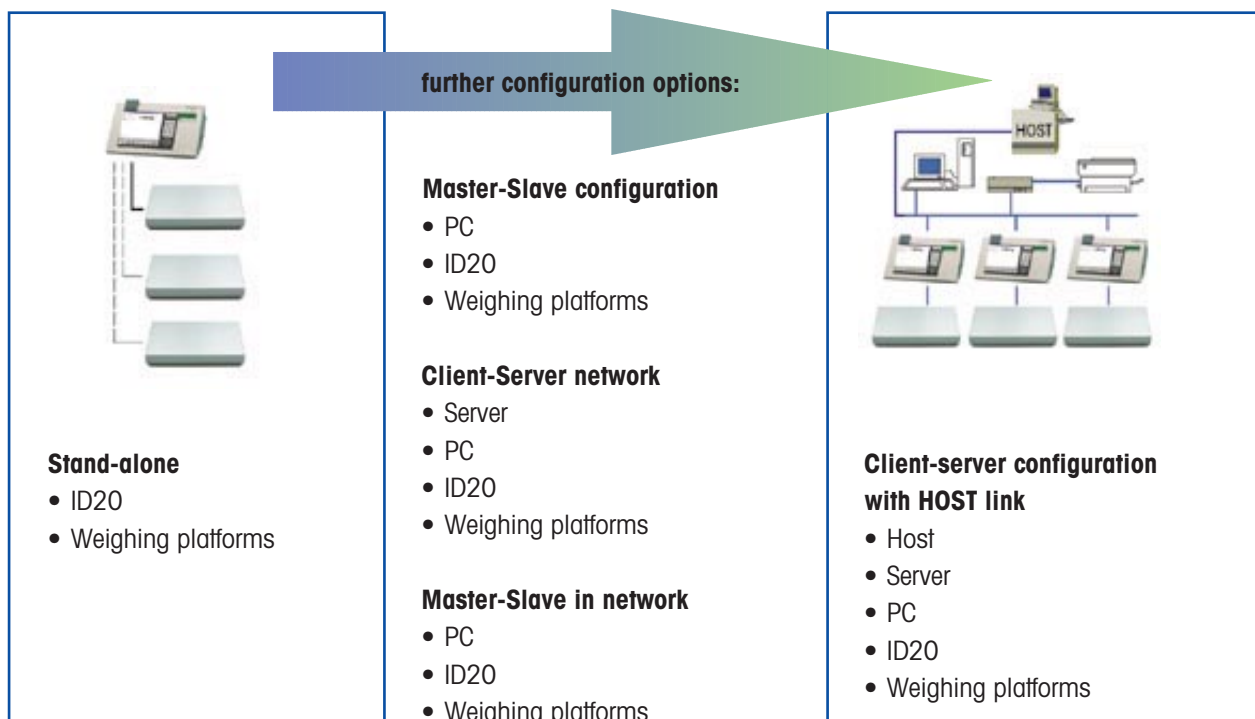

- Communication to certified SAP-R/3® interface and interfaces to other ERP/MRP II systems
- Automatic transfer of master data
- Master data management on host or server
- Automatic update of material consumption
- Standard network solution, e.g. Ethernet, Token Ring, client-server application

Main Functions and Options

Master Data Management	Evaluations and Reports	Options
<ul style="list-style-type: none"> • Material (components) 	<ul style="list-style-type: none"> • Consumption statistics 	<ul style="list-style-type: none"> • SAP-R/3® interface
<ul style="list-style-type: none"> • Formulas 	<ul style="list-style-type: none"> • Formula list 	<ul style="list-style-type: none"> • Dosing
<ul style="list-style-type: none"> • Orders 	<ul style="list-style-type: none"> • Order list 	<ul style="list-style-type: none"> • Active substance control
<ul style="list-style-type: none"> • Authorizations 	<ul style="list-style-type: none"> • Material list (components) 	<ul style="list-style-type: none"> • Auxiliary display
